KKE and NYK Jointly Open New Planning Center in Kumamoto

On September 1, 2014, Kozo Keikaku Engineering Inc. (KKE, Head Office: Nakano-ku, Tokyo, President & CEO: Shota Hattori) and Nippon Yusen Kabushiki Kaisha (NYK, Head office: Chiyoda-ku, Tokyo, President: Yasumi Kudo) established a stowage planning center for container shipping at the Kumamoto office of Kozo Keikaku Engineering Inc. in Ozu town, Kumamoto prefecture, Japan.

The task of container stowage planning will be transferred from NYK's office in Singapore by the end of March 2015. The new center in Kumamoto will play a central role in the stowage planning of NYK's containerships in the Asian region, in addition to cooperation with container terminals at calling ports. Moreover, the all-Japanese staff in Kumamoto will aim to further improve operational quality.

Kumamoto office of Kozo Keikaku Engineering Inc.

KKE will make every effort to provide stable value-added services by fusing the operations research techniques and the data-analysis technology it has cultivated over many years with the NYK Group's on-site capabilities.
