KKE Holds a Seminar for Enhancement of Infrastructure Maintenance Management

Kozo Keikaku Engineering Inc. (Head Office: Nakano-ku, Tokyo, President & CEO: Shota Hattori, "KKE" hereafter) holds a free seminar titled "Enhancement of infrastructure maintenance management" at its head office on Monday 25th February, 2013.

As a lesson from recent accidents of social infrastructure (e.g. bridges and tunnels) caused by its deterioration, the importance of maintainability for social infrastructure is being reaffirmed.

KKE, having focused on the issue for several years, provides services to build a maintenance management cycle for social infrastructure by combining accumulated maintenance management know-how/experience of its customer's and its cutting edge IT/simulation technologies. With today's high awareness for maintenance management, KKE has urgently decided to hold the seminar to bring out its achievements.

A keynote speech will be given by Professor Yozo Fujino in the Department of Civil Engineering from University of Tokyo, regarding the future of infrastructure maintenance management based on his recent studies. The latest technologies for improving maintenance accuracy, objectivity, efficiency, and also structural health monitoring will be introduced on the same day.
